

# SaaS solutions to support your entire recruitment lifecycle

# Access Recruitment

With products to underpin every aspect of your business process the true value comes from end-to-end systems integration.

From candidate attraction, through managing all stages of your client and applicant relationships to payment and billing, we power your activity and join up the dots.

Whether you specialise in temporary, contract or permanent recruitment, our solutions help you work smarter giving you freedom to do more.

## 1

### Winning new clients

Showcase your expertise and specialisms to differentiate yourself in the market.

Nurture client relationships using your **recruitment CRM** to track and surface relevant leads.

Register a job brief with the ideal candidate skills and persona.

Enhance the client and candidate experience with an optimised website that looks great and performs even better.

## 2

### Attracting candidates

Advertise open vacancies to attract suitable jobseekers.

Build a talent pipeline with relevant content, candidate portals and job alerts.

Analyse which sourcing channels perform best for finding and converting appropriate candidates.

Enhance the client and candidate experience with an optimised website that looks great and performs even better.

## 3

### Candidate selection

Shortlist candidates, narrowing down the results of your sourcing.

Filter talent pools with intelligent search, setting call back periods to stay in touch.

Match the right candidate to each brief faster than anyone else.

Integrate your website with your recruitment CRM so new candidates are automatically uploaded with their CVs parsed, ready for review.

## 4

### Candidate screening

Stay compliant by ensuring your candidates have the right to work in the UK and all necessary checks.

Improve your speed-to-hire with faster onboarding.

Protect your recruitment agency from fines with automated screening software.

Confirm a candidate's status in a matter of minutes, giving you total compliance and peace of mind by using screening software that integrates with your CRM.

## 5

### Interview, placement process

Schedule interviews and easily brief candidates for optimum success with automated emails and texts.

Gain feedback from clients, record outcomes, extend offers and negotiate terms.

Assign workers to temp bookings, check them in and conduct regular progress updates.

Manage all aspects of the placement and booking process with an intuitive recruitment CRM that offers streamlined applicant workflows.

## 6

### Pay workers and bill clients

Pay staff, contractors and workers at scale and ensure you are IR35 compliant.

Increase candidate loyalty and retention with **on-demand pay**.

Bill the cash fast and efficiently to keep the cash flowing.

Using specialist pay and bill recruitment software or a managed service allows you to pay candidates accurately and securely whilst managing cash collection seamlessly.

## Powerful reporting

Get the insights that really matter to improve consultant productivity and business efficiency at every stage. Powerful analytics and dashboards to drive higher performance aligned to your strategic objectives.
