

# VISIBILITY CONTROL ACCURACY

## CONSTRUCTION ERP SOFTWARE

From pre-construction to post construction

# INTRODUCTION

Operating effectively in the construction sector is more difficult now than it's ever been due to a host of issues including materials shortages, disrupted supply chains, rising costs, lack of new talent coming into the sector, and onerous environmental targets.

It's not just more of a struggle to keep jobs on track – planning ahead is difficult, adjusting to change is complicated and risky, managing cashflow is more of a juggling act than ever.

This perfect storm means that there has never been a better time to challenge the old ways of doing things and embrace the tools and technology now available to improve your business operations.

# MOVING YOUR BUSINESS TO THE NEXT LEVEL

To stay competitive and profitable, it's crucial to keep on top of what's happening, both in your business and out on site.

The three crucial elements are: visibility, accuracy and control – all of which can be achieved with purpose-built construction software. By moving your business on to an efficient digital software platform, you will see significant benefits from day one.

## Consider these scenarios:

Using complex **spreadsheets to reconcile costs** is not only labour-intensive, it's also prone to delays and human error. With a software solution, it is no longer necessary to wait until week or month end to understand the current position – it can be seen instantly.

Without the right **materials, plant and machinery in place at the right time**, costly delays are inevitable and soon eat into your profit margin. With software you can track all the various elements, and, if necessary, adjust the work schedule quickly in response to changes.

Your skilled workforce of employees and specialist contractors is vital to keep everything moving in the right direction – but **managing who is needed where and when** can be difficult with multiple projects on the go. This is so much easier and more efficient with the right software because you can see everything at a glance, including the hours worked, who has the relevant qualifications and training, even absence.

When **clients change their requirements** it can be a real headache making all the necessary adjustments – and it can end up costing your business money if all the implications are not identified and factored in. A digital solution makes the interdependencies and their impact much clearer so you can feel confident that change won't eventually result in a negative effect on the bottom line.

A photograph of construction workers on a roof. Several workers wearing orange safety vests and hard hats are visible, working on a large, flat roof structure. Scaffolding and wooden beams are visible in the background.

# A MODERN SOLUTION TO TODAY'S CHALLENGES

Access Construction software addresses the challenges of project visibility, cost control and accuracy across your construction sites.

Designed specifically to meet the needs of the building sector, our two core products - EasyBuild ERP and ConQuest Estimating – are guaranteed to make life a lot easier for your people and your business.

## EASYBUILD ERP AT A GLANCE

A comprehensive enterprise resource planning solution that ensures construction companies operate more efficiently with greater visibility and tighter cost control.

- Keep your works on track across multiple sites
- Manage your employee and contractor hours, payroll and training
- Monitor location and cost of materials and plant
- Total visibility and control of all your financial information
- Answer questions from your people, suppliers and clients quickly

## CONQUEST ESTIMATING AT A GLANCE

Construction management software for accurate contract estimates, clear visibility and control of costs, and the flexibility to respond to change quickly.

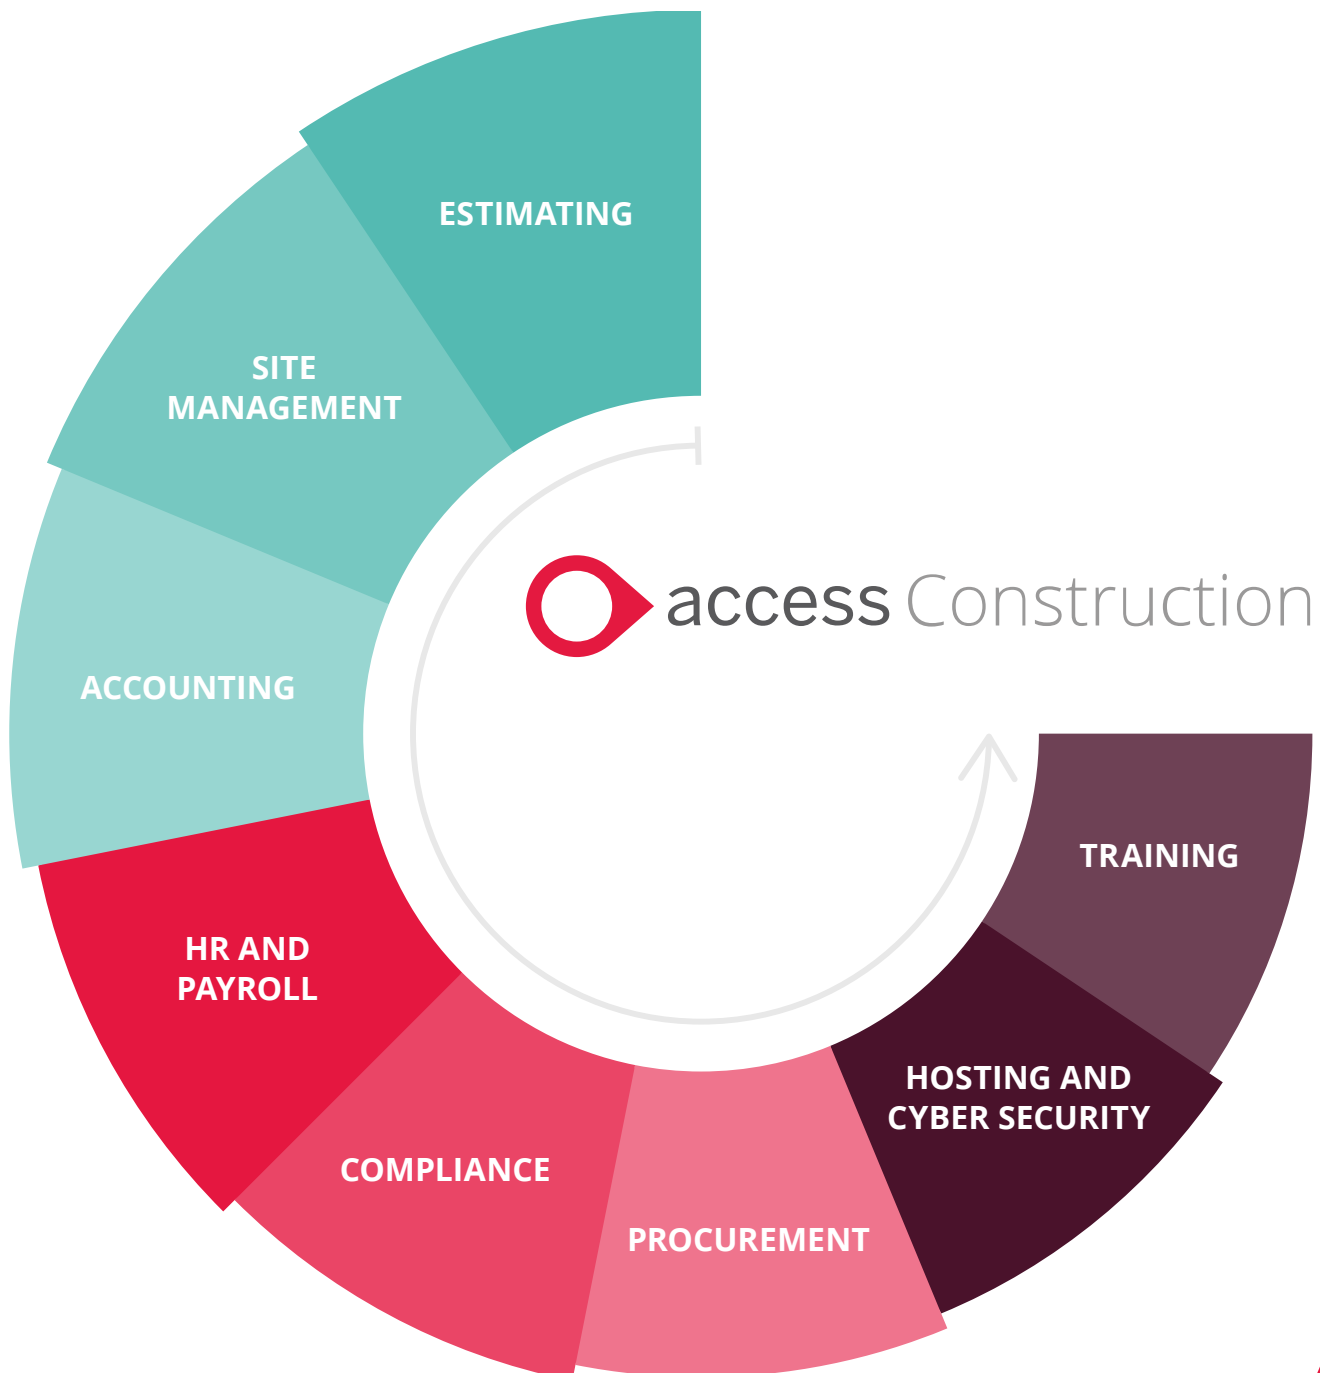

- Build and manage an accurate Bill of Quantities
- 2D and 3D on-screen take-off
- Library of over 10 million cost items
- Easy quote comparisons and cost planning
- A clear view of all estimates and valuations

# EVERYTHING YOU NEED IN ONE PLACE

Access Construction software has two core products written for the construction industry – ConQuest Estimating and EasyBuild ERP Software

Bought alone or as an integrated package, we create the right solution for your company which can scale as you grow.

# AN END-TO-END SOLUTION FOR YOUR CONSTRUCTION FIRM

## ESTIMATING

Cloud-based software which helps your team to work quickly, accurately and with ease.

## SITE MANAGEMENT

Manage stock, plant and assets, labour and costings in real-time, feed information back to the business, and enable commercial and financial teams to work together seamlessly.

## ACCOUNTING

Manage accounts, keep track of financial data, get accurate cost value reconciliation and provide reports in real-time using built-in analytics and dashboards.

## HR AND PAYROLL

Manage timesheets and absence for accurate and timely payroll plus additional support for specifics such as company cars, private healthcare and company pensions.

## COMPLIANCE

Keep track of health and safety requirements, ensure employees have the relevant training, and make risk management and incident reporting easy to manage and audit.

## PROCUREMENT

Keep tighter control of costs, instantly check purchase orders against estimates, reconcile, track and review against historical data stored.

## HOSTING AND CYBER SECURITY

Keep up-to-date with the latest software by moving to the cloud. We'll remove complexities and create a secure, scalable solution that's right for you.

## TRAINING

Health and Safety eLearning for construction – all in one place. You'll also have access to construction software management training to get the most out of our Access Construction solutions.

**VISIBILITY**

**CONTROL**

**ACCURACY**

## WHY CHOOSE ACCESS CONSTRUCTION SOFTWARE?

We understand that investing in a new technology can be daunting and that choosing the right partner can make all the difference.

We have plenty of experience of working successfully with construction firms like yours – so from the outset we focus on creating the best fit solution for your company. We also consider what your longer-term business plans are so that your solution can flex and scale as you grow.

We have two market-leading software solutions designed specifically to meet the complex needs of the construction industry – ConQuest Estimating and EasyBuild ERP. These cloud-hosted packages can be set up individually or as an integrated solution as required. And as well as a fully supported implementation, we'll also provide user training for your staff along with dedicated customer support,. All of this ensures that you get the most out of your new software from day one.

**Let's work together to transform your business.**

## TALK TO US
