

SUCCESS STORY

Access EasyPay Online helps Singapore training provider process payroll remotely

14-year Access EasyPay customer ELITC saves time and effort with an easy-to-use solution

Electronics Industries Training Centre (ELITC) is a non-profit charitable organisation that was founded in 1986 by a leading multi-national electronics company in Singapore. They serve the electronics industry by providing skills upgrading training, Academic Programmes, and Workforce Skills Qualification.

Key outcomes:

- Can process payroll remotely with an easy-to-use cloud solution
- Saves time by avoiding the manual tasks required with on-premise software
- Experienced a painless transition from on-premise to the cloud

Looking for a cloud solution to facilitate remote payroll processing

A 14-year Access EasyPay customer, ELITC was looking for a way to process its payroll remotely due to the challenges posed by Singapore's COVID-19 lockdown. Lim Lee Chin, Executive Director of ELITC, says the Centre had been happy with the on-premise version of Access EasyPay, but she needed a solution that would allow her to process payroll while working from home.

"We have been using the on-premise version of Access EasyPay since 2007 and it has been quite easy to manage. But because it was installed on a computer in our office, when we started working from home, I had to go back into the office to process our payroll," says Ms Lim.

Ms Lim also says that she was looking for a cloud solution to improve the experience of using Access EasyPay.

"With the on-premise version of Access EasyPay, it was only installed on one dedicated desktop computer. So whenever that computer broke down, we had to re-install Access EasyPay onto another computer and ensure that the Windows version installed was up to date."

Simplifying payroll in the cloud with Access EasyPay Online

To overcome these challenges, ELITC chose to become one of the first organisations to adopt Access Easy Pay Online – the cloud-hosted version of Access EasyPay which further enables the secure processing of payroll, anytime and anywhere.

Ms Lim says that Access EasyPay Online provides all the rich features of the on-premise version – like those that help simplify payroll and compliance – along with the ability to process payroll remotely.

"Now with Access EasyPay Online, I can process payroll from anywhere, at any time. We don't need a dedicated computer to use it. I can use it on my laptop, so it's very convenient."

"With the on-premise version of Access EasyPay, I had to save our payroll data multiple times. But with the online version, I no longer have to do so as it saves our data automatically."

We are Access

The Access Group is a leading provider of business management software and solutions to mid-sized UK and Asia Pacific organisations. We help more than 47,000 customers across commercial and not-for-profit sectors become more productive and efficient.

At Access, we believe that ambitious organisations should have software that makes working lives better and not put barriers in the way to growth. Our innovative software solutions streamline everyday processes, provide efficiencies that result in material productivity gains and give real-time insights that allow you to act in an instant knowing you have the data you need at your fingertips, allowing everyone the freedom to do more of what's important.

An easy migration to an intuitive and reliable cloud payroll solution

Access EasyPay Online helps payroll professionals avoid the time-consuming tasks that are often required with on-premise software. For ELITC, this means that it no longer must use the solution on a single dedicated computer and ensure that it has the latest version of Windows installed.

To get started with Access EasyPay Online, all Ms Lim needed to do was install a remote desktop connection from her laptop. And she doesn't have to worry about applying software updates – all are automatically applied to Access EasyPay Online, ensuring ELITC always has the latest version of the software.

"The transition from the on-premise version was easy and didn't require much training. Access EasyPay Online is very simple to use, secure, and provides all the features that we enjoyed with the on-premise version," says Ms Lim

"I'm looking forward to using the HR module for Access EasyPay Online, which will allow our staff to access their payslips online, in addition to their leave. This will be a great help for us as I currently have to print out payslips and deliver them to staff."

"I encourage other businesses to use Access EasyPay Online. Especially now that we're all working from home, I encourage all to go online."
