

Released July 2026.

Issues Resolved

- Fixed an issue where an error could occur when opening a 2026 Individual Tax Return (I form).
- Corrected the prefill of the business ABN so it no longer populates the business name field at item P5 of the 2026 Individual Tax Return.
- Introduced a new prefill option that lets you choose whether Business and Professional Items (P5 to P8) are populated from ATO prefill, giving you control over when these items are included in the main form.
