Zap Data Hub

Automate the process of client data import into Access Ledger and create new efficiencies with Zap Data Hub Compliance Reporting

Import client bookkeeping data into Access Ledger for an efficient compliance process. With Zap Data Hub Compliance Reporting, reduce the time it takes to manually import each client data file into Ledger and eliminate the risk of errors that come with manual data entry.

Zap Data Hub simplifies complex data challenges by providing seamless connection to multiple bookkeeping data sources, making it easy for you to consolidate and manage client data in one place.

High-speed data automation

Zap Data Hub offers high-speed data automation helping you streamline your compliance workflow through a single API that connects to multiple bookkeeping solutions.

Take control of your compliance workflow

Standardise your compliance workflow regardless of the bookkeeping package your clients use. Zap Data Hub allows you to streamline processes within your practice.

Ensure consistent output

Experience consistent output every time. Reduce overhead and eliminate data errors by avoiding manually entering Trial Balance or net movement data into Access Ledger.

High margins on your compliance jobs

Save hours of manual client data collection and get more jobs done. On an average, Zap Data Hub users have saved up 10 hours a week by using this simple and powerful automation.

Simple installation - no downtime

Installing Zap Data Hub Compliance Reporting is quick and easy. It takes less than 2 hours to get you up and running.

Standardise your reporting

Standardise client reporting with the included General Ledger Balance Sheet, P&L and Trial Balance reports.

Included value

Up to 300 client file connections, 5 consumer users and 15GB of data storage. Data sources should be confirmed with an Access sales representative.
