

Access Ledger

Release Update

2025.02

Version 2025.02 released March 2025

Your Access Accountants solution is getting a major upgrade

We're excited to introduce Access Accountants Evo - built on the trusted foundation of our cloud-native solution and powered by Access Evo, it brings cutting-edge innovation and AI-enabled functionality to your practice.

This is the first of many steps in our promise to deliver more value to our loyal customers. We will be in touch with more information about your upgrade to Access Accountants Evo Standard, but in the meantime, [find out more](#).

Access Bank Feeds Enhancements

- The Australian bank connection can now be extended through the Bank Connection Settings screen. As connections will be automatically disconnected upon consent expiry, it is recommended to monitor expiry dates using the following reports:
- **Feed Connection Summary (Tenant Level)** - Available in Bank Feeds menu within Admin Centre, providing a comprehensive overview of all connections at the tenant level.
- **Feed Connection Summary (Feed Level)** - Now includes expiry date

Other Improvements

- Enhanced client finding logic in the HandiLedger migration tool. The Integration Server connection is no longer required.
