

Access UBS Accounting, Inventory & Billing

May 2025 Release Notes

Release Documentation

Version 2025.0 PU2

Welcome to the latest version of our Access UBS Accounting, Inventory & Billing Release Notes!

This document serves as your comprehensive guide to the updates and enhancements in Version 2025.0 PU2. It includes a detailed summary of the changes, including user-friendly links for deeper insights into each new enhancement.

Kindly refer to the Table of Contents for a detailed overview of all the content covered in this document. It will guide you to detailed sections on new features, enhancements, and additional resources to help you make the most of the latest version.

Overview of Access UBS Accounting, Inventory & Billing

Access UBS Accounting & Billing is a comprehensive financial management software designed for small and medium-sized enterprises (SMEs) in Malaysia. It streamlines various tasks, including customer and supplier payments, sales orders, purchase orders, goods receipt notes, and delivery notes. With a user-friendly interface, effortless compliance features, and support for SST (Sales and Service Tax) filings, UBS Accounting & Billing helps businesses efficiently manage their finances and promote growth.

Access UBS Inventory & Billing is a system designed for efficient inventory management in businesses. It provides features such as instant stock updates, precise tracking of inventory movement (including shipments and deliveries), an order entry module, multi-currency support, and comprehensive tracking. Access UBS Inventory & Billing streamlines inventory processes, enhances accuracy, and supports efficient business operations.

Release Summary

Access UBS Accounting, Inventory & Billing v2025.0 PU2.

Important Note:

- **Disable Antivirus Software:** Before installing the new update, temporarily disable your antivirus program. Some antivirus software may interfere with the installation process.
- **Restart Required:** After completing the update installation (whether via Online Update or using the Installer), restart your computer to apply the configuration changes.
- **Update License Activation:** If you use an older version of UBS AIB (before v2022.4), download and run the Service Component Patcher to ensure your license activates correctly.
- **Service Component Patcher:** If you are already on Access UBS v2024.2 and did not get the OU notification, please go to the Download Page to download and run the patch file named Online Update Patcher. When you reopen the application, the OU notification will be prompted.

This release includes several key features. For detailed information on each feature, please click the relevant links. The features are organized by product/area for easy and quick access.

General

New PDF Converter

A new PDF converter to enhance support for Chinese characters, ensuring improved compatibility and accurate representation.

Release Contents

The following section provides detailed descriptions of the features, including relevant screenshots and videos where applicable. Features are organized according to the products/modules in the Release Summary section.

General

New PDF Converter

We have introduced a new PDF converter to enhance support for Chinese characters, ensuring improved compatibility and accurate representation. This improvement will be applied to both the creation of e-Invoices and the email format for PDFs.

Important Note:

Users who need to create PDF documents containing Chinese characters must enable this setting. It is disabled by default since most users do not require Chinese locale support. To support Chinese characters, navigate to Setup > General Setup > Directory tab – refer to the image below. Then tick the checkbox labelled [Enable Unicode support]. Please refer to the note on 'Print To PDF' to understand how the quality of your document's output may vary based on the feature available in your Windows OS.

The screenshot shows the 'Run Setup' window with the 'Directory' tab selected. The 'Print To PDF' section is highlighted with a red box. It contains the following text: 'By default, the system uses the built-in "Microsoft Print to PDF" feature in Windows 10 and newer versions to create high-quality PDF files (at 600 DPI) that look identical to the original. If this feature has been removed, renamed, or is unavailable, the system will automatically switch to a backup PDF tool. This alternative option generates smaller PDF files, but the quality may not be as sharp, and the text in these files cannot be searched.' Below this text is a checkbox labeled 'Enable Unicode support' which is checked. The 'Report Customize' section is also visible, with fields for 'Customize Report Directory' and 'Customize Report Converter Directory'. At the bottom, there are checkboxes for 'Centralized DMS' and 'DMS Integration (Setup)'. The 'OK' and 'Cancel' buttons are on the right.

Issue Resolutions

Here is a summary of the concerns that have been addressed:

- The Consolidated e-Invoice reference numbers are now being generated in a proper sequential order without any duplicates
