Access Ledger
Release Update
2023.04

Version 2023.04 released October 2023

Key Features and enhancements

- Final Accounts is now rebranded to **Access Ledger**
- Chart of Accounts and GST Journals
    - Introduced the ability to activate Chart of Accounts master template based on the HandiLedger chart with ability to update the accounts and tax codes.
    - Introduced "Accountant's Chart" source at file level mirrors the Chart of Accounts from the practice master template which also includes GST rates to allow GST to be processed on Journals.
    - The GST Journal is enabled when the dataset has "Accountant's Chart" source, and the entity is "registered for GST" (new field).
- Introduced comparative view for the Trial Balance screen under Dataset.

Minor improvements and fixes

- Improved the connectivity and performance for Access Bank Feeds module.
- Allowed user to resend invitation for an active user.
- Added the option to select all accounts for the account option in balance screen under Dataset.
- Resolved the issue using arrow key when editing the notes.
