Release Summary

Access UBS Accounting, Inventory & Billing v2025.1

Important Note:

- **Disable Antivirus Software:** Before installing the new update, temporarily disable your antivirus program. Some antivirus software may interfere with the installation process.

- **Restart Required:** After completing the update installation (whether via Online Update or using the Installer), restart your computer to apply the configuration changes.

- **Update License Activation:** If you are using an older version of UBS AIB (before v2022.4), download and run the Service Component Patcher to ensure your license activates correctly.

- **Service Component Patcher:** If you are already on Access UBS v2024.2 and did not get the OU notification, please go to the Download Page to download and run the patch file named Online Update Patcher. When you reopen the application, the OU notification will be prompted.

This release includes the following major features. To explore more details about each feature, please select the relevant links. The features are organized by Product/Area to help you easily locate the information you need.

Accounting

Enhance Service Tax Report (Receipt Based)

The Service Tax Report (Receipt-Based) has been enhanced to provide clearer details on the total amount and tax paid by the customer, including the tax amount that need to report to the government.

[Read more about this feature](#)

General

Digital Assistant

We've moved the Digital Assistant to a more visible spot in the app, so you can get help faster and more easily. All the same great features—now just easier to access!

[Read more about this feature](#)

Issue Resolution

We have addressed key concerns to enhance user experience, ensuring stability, reliability, and efficiency. Our focus on resolving bugs aims to boost customer satisfaction, foster trust, and establish a solid foundation for future development and updates.

Release Contents

The following section provides detailed descriptions of the features, including relevant screenshots and videos where applicable. Features are organized according to the products/modules in the Release Summary section.

Accounting

Enhance Service Tax Report (Receipt Based)

The Service Tax Report (Receipt-Based) has been enhanced to provide clearer details on the total amount and tax paid by the customer, including the tax amount that need to report to the government.

1. Receipt references that begin with two asterisks (**) indicate posted transactions involving deposits or multiple payments that input in the Billing's transaction screen.
2. Updates on the following columns
   a. **Paid Amt** – Show the settlement amount (knock-off amount), inclusive of tax amount
   b. **Paid Taxable** – Displays the taxable amount paid by the customer, excluding the tax. This amount will be reflected in the SST-02 report.
   c. **Paid Tax** – Displays the tax amount paid by the customer. This value, separate from the taxable amount, will also be reflected in the SST-02 report.

General

Digital Assistant

We've relocated the Digital Assistant to a more visible position within the application, making it quicker and easier for you to find support when you need it. Now you can:

- Find help faster without searching

- Get instant answers with less effort

- Stay focused with minimal disruption

Same helpful assistant—now just easier to reach.

Issue Resolutions

Here is a summary of the concerns that have been addressed:

- Fixed an issue where deposit amount is not captured in SST report
- Fixed an issue where in the Opening Balance - clicking on 'X' button after printing report caused UBS system not responding
- Fixed an issue where the SST Service Tax Report (Receipt based) taxable amount is repeated and not correct
- Fixed an issue where taxable amount showing double when doing partial knock off for one invoices
- Fixed an issue where the user is unable to key in company registration number in Billing module if not using SST
- Fixed an issue where in Modern View - DO Remark for Update from second SO incorrect
- Fixed an issue where in Modern View - Transfer Note is not showing the serial no for the item correctly
- Fixed an issue where the Modern View Interface is lagging when there is too big item data
- Fixed an issue where the QR code summary display the wrong bill when scanned, when regenerating eInvoice PDF
