Release Summary

Access UBS BSM v2025.0

Important Note:
- You will need to disable your Anti-virus before you install the new update as some Anti-virus can interfere and prevent a successful installation.
- After successfully installing the update (whether via Online Update or using the Installer), you must restart your computer for the configuration changes to take effect.

The following major features are included in this release, please select the appropriate links if you would like more details on the features. The features are grouped by Product/Area to help you find the information you need easily.

Malaysia eInvoicing

eInvoicing Console

We are thrilled to introduce the new e-Invoicing feature in the UBS AIB system, designed to optimize your invoicing process through automation, real-time tracking, and seamless integration with your current setup. This enhancement simplifies invoice creation, ensures regulatory compliance, and provides enhanced security for your financial data. To begin, simply access the e-invoicing module, configure your settings, and start generating and managing e-invoices with greater efficiency.

Read more about this feature

Release Contents

The below section describes the features in more detail, including screenshots and videos where appropriate, this is ordered by the products/modules identified in Release Summary section.

Malaysia eInvoicing

eInvoicing Console

eInvoicing menu is now made available on the left panel of your working screen. Click to expand the functionalities to address each phase of your eInvoicing workflow needs.

Function	Functional Objective
Outgoing Dashboard	To View, Approve, Disapprove and Transmit documents
Configurations	Maintain additional values required for e-Invoicing in Company, Ownerships, Vendors and Charges/Expenses
Mapping	Realigning current values to comply with data standardization, integration, and compliance for e-invoice

For more details on how the eInvoicing console works, please refer to the eInvoicing guide.
