Release Summary

Access UBS BSM v2025.0 PU2

Important Note:
- You will need to disable your Anti-virus before you install the new update as some Anti-virus can interfere and prevent a successful installation.
- After successfully installing the update (whether via Online Update or using the Installer), you must restart your computer for the configuration changes to take effect.

The following major features are included in this release, please select the appropriate links if you would like more details on the features. The features are grouped by Product/Area to help you find the information you need easily.

General

Digital Assistant

We've moved the Digital Assistant to a more visible spot in the app, so you can get help faster and more easily. All the same great features—now just easier to access!

Read more about this feature

Issue Resolution
We have addressed key concerns to enhance user experience, ensuring stability, reliability, and efficiency. Our focus on resolving bugs aims to boost customer satisfaction, foster trust, and establish a solid foundation for future development and updates.

Release Contents

The below section describes the features in more detail, including screenshots and videos where appropriate, this is ordered by the products/modules identified in Release Summary section.
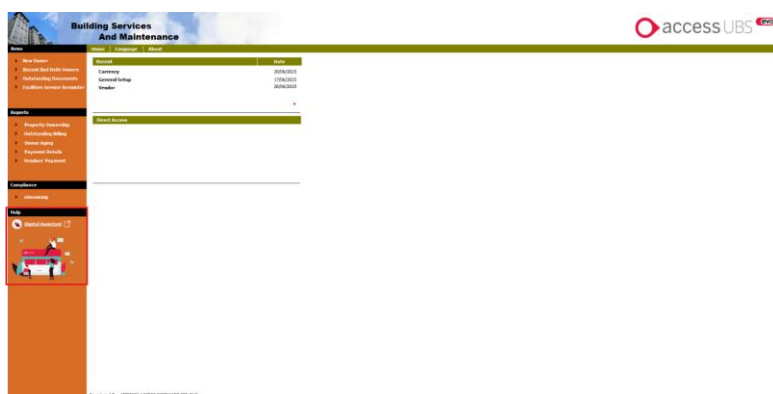

General

Digital Assistant

We've relocated the Digital Assistant to a more visible position within the application, making it quicker and easier for you to find support when you need it. Now you can:

- Find help faster without searching

- Get instant answers with less effort

- Stay focused with minimal disruption

Same helpful assistant—now just easier to reach.

Issue Resolutions

Here is a summary of the concerns that have been addressed:

- Fixed an issue where error is prompted when accessing eInvoicing, if there is space in the company data folder.
- Fixed an issue where error is prompted when restoring older version backup created before the eInvoice build.
- Fixed an issue where CurrencyID in JSON is getting from system currency code, not eInvoice currency code
