Release Summary

Access UBS Accounting, Inventory & Billing v2025.1 PU1

Important Note:

- **Disable Antivirus Software:** Before installing the new update, temporarily disable your antivirus program. Some antivirus software may interfere with the installation process.
- **Restart Required:** After completing the update installation (whether via Online Update or using the Installer), restart your computer to apply the configuration changes.
- **Update License Activation:** If you are using an older version of UBS AIB (before v2022.4), download and run the Service Component Patcher to ensure your license activates correctly.
- **Service Component Patcher:** If you are already on Access UBS v2024.2 and did not get the OU notification, please go to the Download Page to download and run the patch file named Online Update Patcher. When you reopen the application, the OU notification will be prompted.

This release includes the following major features. To explore more details about each feature, please select the relevant links. The features are organized by Product/Area to help you easily locate the information you need.

Malaysia eInvoice

Release Contents

The following section provides detailed descriptions of the features, including relevant screenshots and videos where applicable. Features are organized according to the products/modules in the Release Summary section.

Malaysia eInvoice

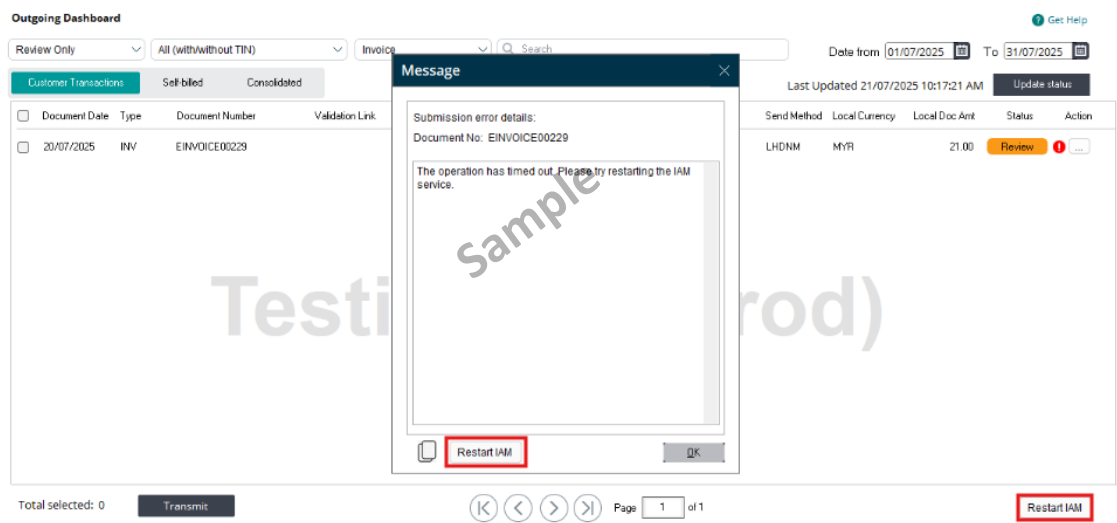

Restart IAM service

You can now restart IAM service from the following screens, Outgoing Dashboard and Message dialog box as per images shown below.

To enhance user experience and streamline troubleshooting, we have introduced a new "Reset IAM" button. This feature allows users to quickly restart the IAM service in the event of a connection issue, no need to wait or escalate to Support. Simply click to reset and reconnect seamlessly.

Page Numbering

We have also added page numbers to enhance navigation and referencing if you have large volume of data. This small but impactful update makes it easier for you to locate, cite, and revisit specific pages with confidence and clarity. Please refer to the Outgoing Dashboard image below as an example.

General

Issue Resolutions

Here is a summary of the concerns that have been addressed:

- Fixed an issue that causing slow performance when accessing elnvoice Configuration and Mapping from client computer
- Fixed an issue where IAM turned to grey and not able to connect the IAM
- Fixed an issue when printing cash receipt, error prompted “Variable ‘eimported’ is not found”.
